

CONTENT TRANSFER PROGRAM

Are you currently looking to migrate your school media from a legacy platform? At a marginal cost, we'll help your school transfer batches of photos and videos into the Vidigami system along with their respective data, saving hours of time, effort, and resources. To get started, here's what we'll need:

1 Access to Legacy System

Please provide an administrative login to a legacy system so that we can access your current media and metadata. When uploading this content to Vidigami, we will use our best judgement to set up groups and albums based on your original structure. You will be able to modify this structure at any time after the transfer.

2 Importing Metadata

You may wish to preserve your media metadata during transfer. If we are able output content in IPTC format, we will flow the associated metadata, including tags, into Vidigami. Read more about IPTC standards here:

iptc.org/standards/photo-metadata/iptc-standard/

3 Cost and Time to Complete

Transfer Cost: \$25/1000 photos.

A timeline will be negotiated based on your needs and available Vidigami resources. Assuming no unexpected challenges arise, up to 10,000 photos can be transferred within a scope of 2 weeks (depending on the upload queue at the time).
